DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 12, 15-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Balkwill (US 5279585). Balkwill discloses a medication delivery pen having a housing 18, a drive member 26, a fluid container 46, a nut 28, a screw element 16, a nut rotating element 30, and a nut advancing plunger 22. The device comprises a sleeve and a button 24, and a spring 32 biasing the nut rotating element and the screw element from the second axial arrangement toward the first axial arrangement. The screw element and nut rotating element have teeth 30c that engage. The nut and nut advancing plunger have clicker elements for creating audible indications during dose preparing (Col. 6, lines 5-15). The plunger includes a flange 22b. Insulin is in the reservoir (Col. 1, lines 10-15).

Allowable Subject Matter

3. Claims 10, 11, 1, 14, 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3763

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Strowe et al (US 6277099) discloses a medication delivery pen very similar to that of applicant's invention and Balkwill.
